MESSAGE

I congratulate the Indian students and their parents - participants of “SOBRANIYE-2018” - the pre-departure ceremony on the occasion of going to study medicine in Russian universities. I take this opportunity to wish all success to the students, and earnestly hope that they will have a creative environment on a broader perspective to widen their professional life for a bright future of their families and country.

Rus Education is an exclusive partner of the Russian Centre of Science and Culture (Cultural Department of the Embassy of the Russian Federation in India) to promote Russian education among Indian citizens. Russia provides great opportunities with one of the best educational systems in the world. Under its multifarious activities, **Rus Education** gives extensive information about Russian universities, check and collect documents from students, give advertisement in print, electronic and mass media, organize seminars and carry out all methods aimed at promoting Russian education in India. Equipped with an efficient, vibrant team of counsellors serving across India, **Rus Education**, since its inception 25 years ago, is a pioneer laying the foundation for the growth and overall well-being of students' community enabling the students to pursue their dreams of obtaining quality education in reputed universities at affordable cost in Russia. Every year, **Rus Education** organises Educational Fairs in which high-power Russian delegation comprising educational experts such as vice-chancellors, academics, professors and specialists drawn from leading universities are taking part.

It deserves special mention that the students are fortunate enough in getting admission to globally-reputed recognised Russian medical universities, conferring degrees broadly recognised by international institutions such as UN, WHO and UNESCO. Russia holds the credit of producing hundreds of thousands of Indian medical professionals serving humanity across the world.

I once again congratulate the Indian students and their parents. Please accept my warm and hearty best wishes.

Fedor Rozovski
Counsellor and Head of the Cultural Department,
Embassy of the Russian Federation in India
Director, Russian Centre of Science and Culture in New Delhi
